

Innovation Scorecard

The Innovation Scorecard reports on the use of medicines and medical technologies in the NHS in England which have been positively appraised by the National Institute for Health and Care Excellence (NICE) since 2012. NHS Digital publishes this information every three months on behalf of the Office for Life Sciences.

What do we measure?

104
medicines

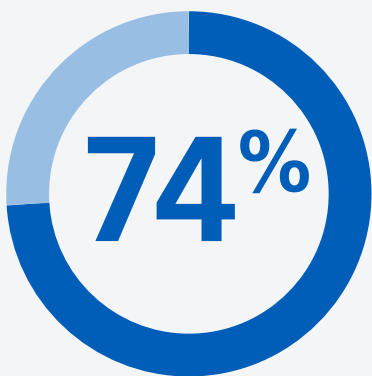

4 groups
of medicines used to
treat major conditions:

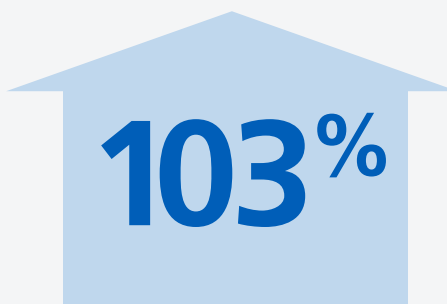

- Acute coronary syndrome
- Diabetes
- Multiple sclerosis
- Stroke

What have we found?

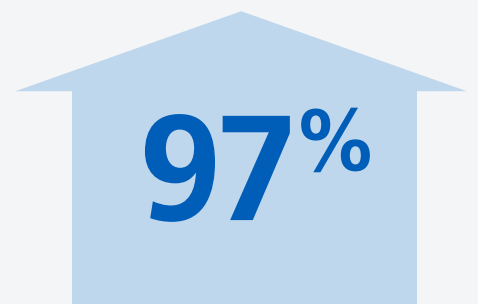

For the 12 months from October 2015 to September 2016 (compared to the previous 12 months)

medicines
prescribed
more*

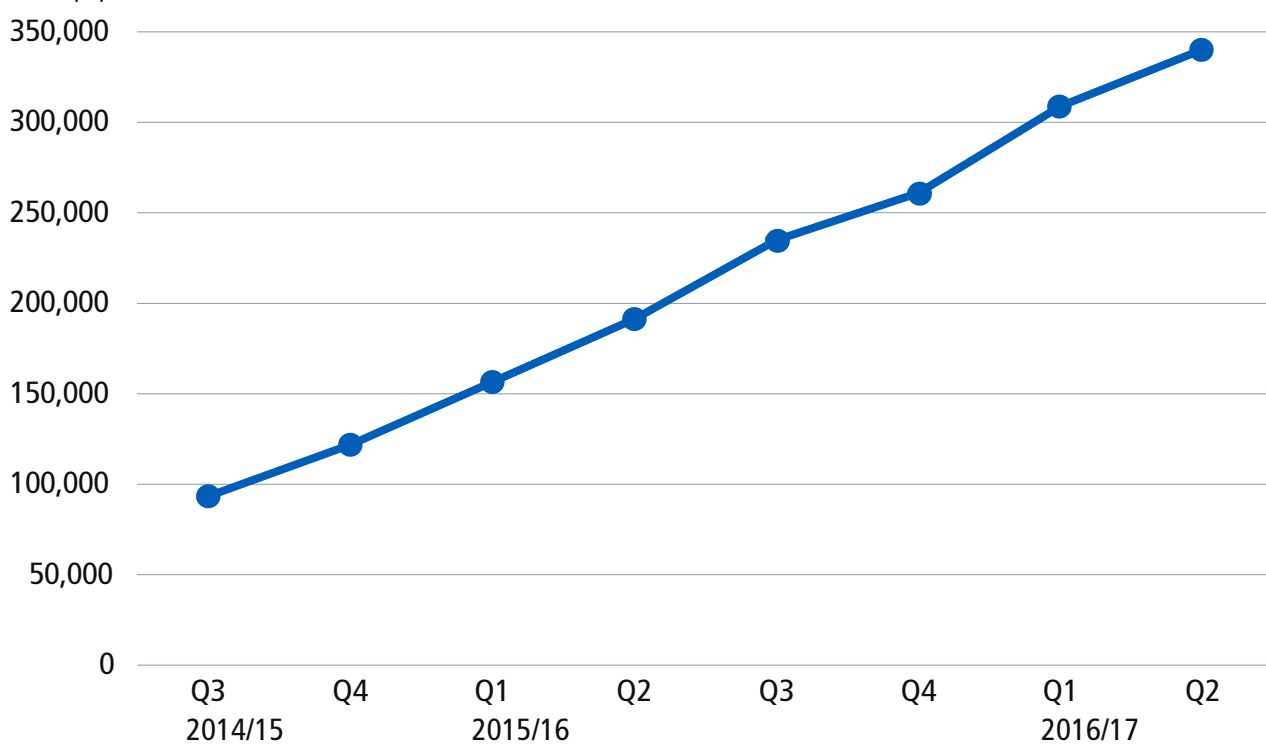

increase in use of
diabetes medicines*

increase in use of
stroke medicines in
primary care*

Use of diabetes medicines from October 2014 to September 2016

ADD per 100,000 population
