Type: Change Request
Reference: 1572
Version No: 1.0
Subject: Sexual Orientation
Effective Date: 1 April 2017
Reason for Change: Change to Data Standards
Publication Date: 21 September 2017

Background:

Sexual orientation is one of the nine protected characteristics defined by the Equality Act (2010). The Act and the corresponding public sector Equality Duty (section 149 of the Act) contain a legal obligation for all public sector bodies to pay due regard to the needs of lesbian, gay and bisexual (LGB) people in the design and delivery of services, and to ensure (and be able to demonstrate) that people are not discriminated against based upon their sexual orientation.

Sexual Orientation Monitoring (SOM) is essential in order for such bodies to comply with the requirements of the Equality Duty.

This fundamental standard provides the mechanism for recording the sexual orientation of all patients and service users aged 16 years and over across the whole of health and social care in England.

All new data sets with a business requirement to collect sexual orientation data will be expected to adopt this sexual orientation monitoring (SOM) fundamental standard, and existing data sets already reporting SEXUAL ORIENTATION CODE will be required to change to the new values at their next iteration.

This Change Request adds the supporting definitions and values for Person Stated Sexual Orientation to the NHS Data Model and Dictionary to support the Sexual Orientation Monitoring Information Standard.
